TRADITION OF EXCELLENCE

卓越した伝統：現代金工作家に見る日本伝統技術

Japanese techniques in contemporary metal arts

In traditional Japanese metalwork artists use techniques such as Hagiawase Zogan, Kasane-gane, Mokume-gane, and Nunome-Zogann to create pattern in their work. Pattern is defined as a repeating form or design made of shapes, lines or colors.

Color and cut out the shapes on the next page. Use them to decorate the vase with a pretty pattern!
