## ARTIST STATEMENT

*My work is an exploration of my relationships with others. I internalize different situations and interactions with others in order to put them back out in to the world in a re-imagined way. Each piece is inspired by my poetry, which allows the sculptures to stand as a visual representation of the written work. I utilize the strength, weight, and permanence of cast iron to comment on the resilience of the relationships paired with hand knit material to connote comfort, safety, and familiarity in the pieces.*
